Education

Galgotias University, Greater Noida

Bachelor in Computer Application

2023 – 2026

(Currently in Final year)

KALA NIKETAN SR. SEC. SCHOOL

2020 Class 10th

ROSHANARA SARVODAYA G. SCHOOL

2022 Class 12th

Career Objective

I am a dedicated and hardworking final-year BCA student (Currently in 6th semester) with knowledge and web technologies including HTML, CSS, JavaScript, SQL, DBMS, and Python. I am currently enhancing my skills by building projects and learning version control using Github. I am seeking an entry-level role in IT sector where I can apply my technical knowledge, improve my practical skills, and contribute effectively to the organization while continuously learning new technologies.

Projects

Smart City Explorer | Web Development Project

Developed an interactive map-based web application using HTML, CSS, JavaScript, and Leaflet.js to help users explore important places within a city. The project includes features such as location search, route calculations to find distance and displaying nearby places like hospitals, metro stations, and restaurants on the map. The application integrates Leaflet.js for map visualization and markers, and focuses on creating a responsive and user-friendly interface to improve navigation and accessibility.

Salon Website | Web Development Project

Currently working on developing a responsive salon website using HTML, CSS and JavaScript to showcase salon services, pricing, and contact information. The website includes pages such as Home, Services, and Appointment/Schedule section. The project focuses on designing an attractive and responsive user interface with images, colour styling, and easy navigation. A location map feature is also being integrated to help users find the salon easily and improve overall user experience.

URL Shortener | Python Project

Developed a Python-based URL shortener tool that converts long URLs into shorter and more manageable links. This project helped strengthen understanding of Python programming concepts, especially string handling and basic logic implementation. It also improved problem-solving skills and practical knowledge of how simple tools can be developed using programming.

Certifications

Data Visualization using Power BI – Great Learning (2026)

Completed an online certification course focused on creating interactive dashboards, data visualization techniques, and understanding business insights using Microsoft Power BI.

Python Developer Virtual Internship – CodeClause (March 2025 – April 2025)

Completed a virtual internship focused on Python programming and practical project development, which helped strengthen concepts of programming logic, problem solving, and real-world application development.

Diploma in Basic Computer Applications (2022 – 2023)

Completed a one-year diploma covering fundamental computer skills including MS Office, Management Information Systems (MIS), Advanced Excel basics, typing, and general software applications.

Technical Skills

Languages: Python, C++, HTML/CSS, ML, Java(Basics), DBMS understanding, SQL. Developer

Tools: VS Code, GitHub, Google Collab, MS Office, PostgreSQL

Soft Skills: Adaptability, Leadership, Team Work, Collaboration, Time management.
