PROJECTS

HousePriceAI — California House Price Prediction

[Live Demo](#)

Python · Scikit-learn · Random Forest · Pandas · NumPy · Vercel

- Built an end-to-end machine learning web app that predicts California house prices using a Random Forest model trained on the California Housing Dataset.
- Handled data preprocessing and feature engineering, then evaluated the model using RMSE and R² metrics before deploying the live application on Vercel.

Smart City Explorer

[Live Demo](#)

HTML5 · CSS3 · JavaScript · Leaflet.js · GitHub Pages

- Developed an interactive map-based web app where users can explore nearby hospitals, metro stations, and restaurants via live location markers.
- Used Leaflet.js for dynamic map rendering, custom markers, and route distance display; built with a responsive, mobile-first layout and deployed on GitHub Pages.

Personal Portfolio Website

[Live Demo](#)

HTML5 · CSS3 · JavaScript · GitHub Pages

- Designed and built a personal portfolio site to present projects, skills, and background in a clean layout, with CSS animations and full mobile responsiveness.
